SUMMARY

I am a Junior Quality Assurance Engineer, I am highly motivated to continuously learn and develop my skills in the field of software testing. I am actively seeking a company that will provide me with opportunities to expand my knowledge and grow as a Software Tester.

My skills:
- Good knowledge of Software testing theory;
- Knowledge of SDLC and Development Models (Waterfall,
- V-model, Spiral);
- Knowledge of STLC (Levels of Testing and Type of Testing, Test Design);
- Understanding of Defect Life Cycle;
- Writing test cases, checklists, test plans, bug reports, and test reports;
- Understanding the principles of Agile, Scrum, and Kanban;
- Experience with programs TestRail, Jira, Postman, and Trello;
- Experience with Git, Git Bush, and Visual Studio Code;
- Knowledge of HTML and CSS;
- Knowledge of client-server architecture and web application testing;
- API testing, creating HTTP requests;
- Understanding mobile testing and application types;
- Basic knowledge about creating automation testing in Selenium IDE;
- Ability to work as a team and to quickly learn, attention to detail;
- Responsibility and discipline.

Courses

- Basic QA online course by Tetiana Shylina;
- Intensive training "Commercial project testing", I QA Engineer School;
- Practical course "Software Testing" by Popeliuha on Youtube;
- Practical marathon "HTML & CSS", GoIT;
